

MINOR SURGERY

Do you have an ugly mole, or skin tags that you want to remove? At the All Naturopathic Clinic, we offer many minor surgical procedures that can be performed in our office under local anesthesia including removal of moles, skin tags, warts, cysts, lipomas and many more.

During your first consultation, we will go over the surgical procedure, preparation, and dietary and or supplementation to help strengthen and minimize the possibility of infections or other complications. Then, you will have time to build a good rapport with your doctor. It is important to have clear communication with your doctor. Ask questions and get clarification on anything you don't understand. Come to expect the very best result from your surgery. Our doctor will explain ways to help increase wound healing, strengthen the body's immune system, and follow up instructions.

So why live with unwanted skin lesions that diminish your appearance and health? Many insurance plans do cover for certain procedures. We invite you to come visit our office for more details.
